

Three glamorous makeup looks you can do in less than 2 minutes!

Guess who isn't the late friend anymore? These three very-so-now looks will make sure that you look polished glam that you can complete before your Uber arrives.

1. The Intense Burgundy lady

An ultra-dark matte pout has a long way to go when it comes to evergreen fashion and the genius thing about bold lip colors is that you can slack off the rest of makeup and let the lips do the talking. Let your skin speak for itself with a dewy, healthy glow that contrasts the matte texture of the lip, you can even skip the blush and even the eyeliner! Just add a bit of bronzy cream highlighter in the inner corners and on the center of the lids.

Use a little bronzer to warm up your face and to lightly contour it. Dab the liquid lip color straight onto the center of your upper and lower lips, press lips together, and use your index finger to push the color in and out into the corners and you are good to go!

2. The classic winged eye

This cat eye is no ordinary little flick: The straight clean lines are modern and just the slightest bit exaggerated, but still with a coquette-ish twist. Paired with a light pink lip and a pale pink cheek blush this is everyday glam go-to look.

Dip an angled eyeliner brush into a gel liner and, with your eyes open, stamp a line that follows the same angle as your lower lash line. Sketch a line from the outer corner of the stamp in toward your upper lash line - the thicker and more exaggerated the line, the further toward your inner corner the liner should go.

3. The bold brow look

Image Source: Elle/Nina Park

Full, brushed-up brows look undeniably fresh and even rebellious - no overly manicured arches here. Use a transparent gel to accent your look. Dust some finishing powder and a rusty reddish brown lip for that fresh modern look. Don't forget to line your upper eyelashes with a light natural pencil or gel eyeliner.
